► THE BIG IDEA

Here's the whole thing, in **plain English**

**Some apps pay you to bring people in.
They give you a special link.
Someone signs up with it → **you get paid.****

Cash. Gift cards. Or coins you can cash out.

That's it. That's the business.

This guide does four simple things for you:

- **Gets you a link** for every app on the list.
- **Shows you the free stuff** to claim — and how to claim it fast, every day.
- **Builds you a server** so all your links open at once. One tap.
- **Hands you AI prompts** that write your videos — so people actually see your links.

THE ONE LAW:

Small actions, repeated, beat big plans you never start.

Sign up. Grab the link. Claim daily. Post. Repeat.

Run the loop — the money shows up.

```
[1 SIGN UP] --> [2 LINK + FREE] --> [3 SAVE] --> [4 SERVER] --> [5 ALARM] --> [6 POST]
'----- ( run it every day ) <-----'
```

STRAIGHT TALK. Most of the casinos here are **free-to-play sweepstakes sites** — free to join, "no purchase necessary," 18+ or 21+, and not legal in every state. To earn the casino referral money, your friend usually has to buy coins first. The cash and gift-card apps (SoFi, Opus, Honeygain, Fetch, Mistplay, Vultr) pay real money. Bonus amounts change all the time — always check the app. And always tell people your links are referral links. Honest lasts. Spam gets you banned.

► **STEP 1**

Sign up for **everything**

**You can't get paid on an app you never joined.
So we join them all. One sitting.**

Before you start, set up your kit. Five minutes. Do it once.

► **YOUR STARTER KIT**

1. **One email.** Use one clean email (a fresh Gmail is perfect). Every signup goes through it.
2. **A password manager.** Bitwarden is free. It makes and remembers a strong password for each site. Never reuse passwords. Never write them in your notepad.
3. **Your phone + ID nearby.** Many apps text you a code. Casinos and banks need a photo of your ID before they pay you. Have both ready.
4. **Your notepad open.** Open `my-accounts.txt` on the side. You'll fill it as you go.

Now work down the list. Open the link, sign up, confirm your email, verify if asked.

Don't stop to do anything clever yet. Just get every door open.

===== THE LIST =====

- **Casinos (free coins):** Crown Coins · Rolla · RealPrize · SpinBlitz · McLuck · Blitz · Casino.click · Baba · Spree · Wow Vegas · Ignition
- **Make-videos tool:** Opus (it cuts your videos for you — you'll use this in Step 6)
- **Free cash / gift cards:** Fetch · Mistplay · Honeygain
- **Bank bonuses:** SoFi (Loans · Invest · Money · Crypto · Credit)
- **Your server:** Vultr

USE THE LINKS IN THE BACK. Sign up through the house links in the vault (last pages). They get you in correctly. Then in Step 2 you grab **your own** link to share.

► STEP 2

Grab your link. Grab the **free stuff**.

Two things in every app:

- 1) find your own link.
- 2) claim the free bonus.

► HOW TO FIND YOUR LINK (WORKS ALMOST EVERYWHERE)

1. Tap your **profile or menu** (top corner).
2. Look for **Refer a Friend**, **Invite**, **Rewards**, or **Affiliate**.
3. Copy the link or code it gives you. **That one is yours.**
4. While you're there, claim the **daily bonus** and any "follow us for free coins" offers.

READ THIS FIRST. On the casinos, joining and playing is free — but you usually only earn referral coins after your friend **buys** a coin pack. A few (like Baba) pay just for signing up. Numbers below are current as of mid-2026 and **change often** — check your own account.

FREE STUFF: new users get up to **\$100 trial credit**; you earn ~\$25-\$35 once they stay active 30 days.

DO YOUR ID CHECK EARLY. Casinos and banks hold your money until they confirm who you are. Verify each one now so a payout never gets stuck later. Real details only — never fake info.

► STEP 3

Put every link in **one notepad**

**A link you can't find is a link you don't have.
So they all live in **one file**.**

Not a spreadsheet. Not ten different apps.
One plain text file you can open anywhere
and copy a link from in two seconds.

► BUILD YOUR NOTEPAD

1. Open `my-accounts.txt` from your kit.
2. For each app, write: email used · signed up ✓ · verified ✓ · **YOUR link** · bonus claimed ✓.
3. **No passwords here** — those stay in your password manager. This file is just links.
4. Keep it where you always have it: phone notes, a synced text file, or your server.

```
# my-accounts.txt – one block per app
APP: McLuck
  Email:      you@email.com
  Signed up:  [x]   Verified: [x]
  MY LINK:    https://www.mcluck.com/lp/raf?r=<YOUR-CODE>
  Bonus:      [x] claimed
  Daily:      [x] login
```

► ALSO SAVE YOUR API KEY (THE SECRET ONE)

Your **Vultr API key** is the password that lets automation run your server.

Keep it **private** — never in a public file, never in a video.

Store it in a separate, hidden notes file or your password manager.

We've kept yours saved privately for you already.

When the notepad is full, you're holding a map of every link that pays you.

That map is the asset. Everything after this points traffic at it.

► STEP 4

Open them all from one **server**

**Imagine a computer that never sleeps.
You log in. Every link is already open.
You claim everything in minutes.**

That's the server.

It's a cheap computer that lives in the cloud (about **\$5-\$6 a month** on Vultr).
It stays on 24/7. You reach it from your phone.

► WHY IT CHANGES EVERYTHING

- It stays **logged into every app** for you. No re-typing passwords.
- Your browser keeps **every daily-bonus page saved**. One tap opens them all.
- You stop hunting for links. You just **log in and claim**.
- It's the same machine the AI uses to **make and post your content** (Step 6).

► SET IT UP (the easy way)

1. Sign up for **Vultr** (your link's in the vault) and start a small cloud computer.
2. Want it done for you? Use the **CASH.BOT OS** — it builds this exact always-on machine for you, step by step (the BUILD branch / Prompt 1). If you've run that, you already have it.
3. Open the browser on the server and **log into every app once**. Save them all as bookmarks/tabs.
4. Drop in the **daily-claim launcher** we made you (next page) — one page, a button for every bonus.

► YOUR ONE-TAP LAUNCHER: [DAILY-CLAIM.HTML](#)

We built you a page with a button for every daily bonus.

Tap "**OPEN ALL DAILY BONUSES**" and they all open at once.

Or tap them one by one. Claim. Move on.

Keep it on your server's browser — and on your phone home screen.

HONEST NOTE ON LOCATION. The casinos check where you are. A cloud server in a faraway data center can get flagged, and some won't let you redeem from it. So: use the server to stay organized and to run your content — but if a casino blocks the server login, **claim that one from your real phone. Mistplay and Blitz are phone-only apps** — always claim those on your phone. Never use a fake location; it gets accounts banned.

► STEP 5

One **daily alarm**. One quick sweep.

Set one alarm.

Same time. Every day.

Label it: CLAIM MY BONUSES.

► THE DAILY ROUTINE (5–10 MINUTES)

1. Alarm rings.
2. Open your **server** (or the launcher on your phone).
3. Run down the list. **Claim each daily bonus.**
4. Tick it in your notepad. Done.

Why the same time every day?

- **Streaks pay more.** Many apps give bigger bonuses the more days in a row you show up.
- **Miss a day and some reset to zero.** The streak is real money — protect it.
- **A habit beats motivation.** Same time, same place, no thinking. Just do it.

► SET IT NOW

Open your phone's Clock app.

New alarm → pick a time you're always free (morning coffee works).

Repeat: **every day**.

Name it "**CLAIM MY BONUSES.**"

That alarm is your paycheck reminder.

THE TRUTH ABOUT THIS STEP:

It's boring. That's the point.

Boring, repeated daily, is what actually builds the money.

Ten minutes a day. Every day. No exceptions.

► **STEP 6**

Let **AI** make your videos

**Your links earn nothing until people see them.
So we get them seen — with short videos.
And the AI writes them for you.**

You don't need to be a writer.

You don't need to be good on camera.

You give an AI a prompt. It hands you the video.

► **THE PLAY (REPEAT FOR EACH APP)**

1. Pick **one app with a free offer** (free coins, free cash, free gift card).
2. Open any AI — **ChatGPT, Claude, or Gemini** (free versions work).
3. Paste one of our **prompts** (next page). It writes your hook, script, and caption.
4. Film it in 30 seconds — or just **screen-record the app**.
5. Post it. **Link in bio. Pin the link in the comments.**
6. Next app. Repeat.

► **COPY WHAT ALREADY WORKS**

Don't guess. Before you post:

Find **3 videos** in this niche getting **way more views than normal**.

That's a format that works.

Make the same kind of video — your spin, your app, your link.

Copy the recipe, never the clip.

► THE AUTOMATION SHORTCUT (OPUS)

Record **one** longer video about your top 3 free-offer apps.

Drop it into **Opus** (it's in your vault).

It auto-cuts it into a dozen short clips, adds captions, makes them vertical.

One recording → a week of posts. That's the automation.

► SET UP YOUR ACCOUNTS

- Make a **TikTok, Instagram (Reels), and YouTube (Shorts)** — same name on each.
- Pick **one angle**: "free money apps," "side hustles," "passive income." Stick to it.
- Make a free **Linktree**, drop ALL your links in it, put that one link in every bio.
- Log it all in `my-socials.txt`.

STAY HONEST. Say your links are referral links — it's required and people trust it. Don't promise guaranteed money; show what's real. Follow each app's rules on gambling/finance content. Honest creators last. Spammers lose every link at once.

► COPY · PASTE

The AI prompts

Paste into any AI. Swap the [BRACKETS] for your app + offer.

LAST HONEST WORD. The casinos are free-to-play, "no purchase necessary," 18/21+, and not legal in every state. Ignition is real-money gambling — play responsibly. Bank products involve real money and eligibility checks. Every bonus amount is set by the app and **changes without notice** — always confirm in your own account before you promote a number. Tell people your links are referral links. This guide teaches a system. It does not promise income.
